

Preparing Your Space for Bed Bug Heat Treatment

PRIOR TO OUR ARRIVAL, WE REQUIRE THAT THESE SIMPLE PREPARATIONS BE COMPLETE.

Preparing your space is relatively easy and you'll be glad to know that no bedding, clothing or furniture needs to be thrown out.

Because we will be using sustained high temperatures, we ask that you remove all animals, plants and heat sensitive items (items which could melt) from potential contact with our heat treatment. (**NOTE:** many of these items may be temporarily stored in an insulated location such as your stove, fridge or freezer. If you have a balcony, storage unit, yard or garage and weather permits, anything may be stored there as well.

Ensure that drawers and closets are loosely packed and free of clutter.

Please remove the following heat-sensitive items from the rooms and area(s) to be treated:

- All plants and animals/pets
- Fresh fruits and vegetables, chocolates, carbonated beverages, wines, and liquors
- Candles, wax, crayons, lipstick and other cosmetics that may melt
- All medicine and vitamins
- Arts and craft items that are assembled with hot melt glue
- Vinyl records stored to avoid warping
- Oxygen tanks, Aerosol containers (spray cans), fire extinguishers, cigarette lighters, matches and other combustible items
- Musical instruments (may detune, or worse, due to expansion and contraction and potential glue melting)
- Oil/acylic paintings (other artwork should be removed from wall and placed on floor or stored elsewhere)

OTHER IMPORTANT PRECAUTIONS

- Plastic blinds must be pulled tight
- Appliances, including computer towers, televisions, stereos, radios and clocks should be unplugged. There is no need to unplug kitchen appliances
- Clothing should be hung with as much space as possible between items. Some clothing may be left in drawers provided it is not more than a few inches deep.
- Please remove as much clutter as possible to allow the heat to permeate the environment.
- Gather and store loose paper and other easily wind-blown items.

FOR YOUR CONVENIENCE

- If you require medications, please ensure that you take a daily supply with you.
- You will NOT have access to your unit/possessions until the completion of the treatment, so please take with you anything else you will need for the time being.

IMPORTANT!

Any items removed from the premises must be closely inspected for the presence of bed bugs. If the items have bed bugs in or on them, they will be reintroduced to your premises as soon as the items are returned. The treatment will not be successful and stated or implied warranties will be void.
